LETTER OF TRANSMITTAL.

THE PANAMA CANAL,
DEPARTMENT OF HEALTH,
Ancon, Canal Zone, August 11, 1914.

TO the GOVERNOR OF THE PANAMA CANAL,
Culebra, Canal Zone.

SIR: I have the honor to submit the following report of the operations of the department of health for the month of July, 1914.

Very respectfully,

CHAS. F. MASON,
Chief Health Officer.

GENERAL REMARKS.

No cases of yellow fever, smallpox, or plague originated on or were brought to the Isthmus during the month.

VITAL STATISTICS.

EMPLOYEES.

The very large movement of employees from the Canal Zone to Panama and Colon, which has recently taken place, will no doubt affect their vital statistics, though this effect is not apparent.

When the last zone census was taken in February, 1912, only about 9,872 employees out of 42,174 were living in the terminal cities, while now over one-half of the employees live in these cities. The health of the employees continues very good. The number of names on the rolls for the preceding month was 46,616.

The total number of admissions to hospitals and quarters was 1,424, or a rate of 366.57 per thousand per annum, as compared with 381.09 for the preceding month, and 513.87 for the corresponding month of last year.

The total number of deaths from all causes was 27. Of these 16 died from disease, or 4.12 per thousand per annum, as compared with 3.28 for the preceding month, and 5.38 for the corresponding month of last year. The diseases causing the largest number of deaths were as follows: Lobar pneumonia 3, and tuberculosis 3. No other disease caused more than 1 death.

The number of employees per thousand constantly sick was 11, compared with 11.69 for the preceding month, and 15.19 for the corresponding month of last year.

The disease causing the highest admission and noneffective rates in hospitals was malaria, with rates of 87 per thousand per annum

and 1.66 per thousand, respectively. The corresponding admission rates for last month and the same month of last year were 62 and 69; 35 per cent of all admissions were due to this cause.

The next highest admission rates were for venereal diseases, diseases of the digestive system, nervous system, and respiratory system. These five classes of diseases caused 62 per cent of all admissions.

The admission rate for typhoid fever per thousand per annum was 0.51, as compared with 0.00 for the preceding month, and 0.83 for the corresponding period of last year.

EFFECTS OF RACE.

The admission rate to hospitals and death rate for disease for black employees were 151.58 and 4.56 per thousand per annum, as compared with 386.33 and 1.69 for white employees. The non-effective rate for disease and injuries for black employees per thousand was 9.78, as compared with 17.76 for white employees.

The admission rate to hospitals for malaria was 78.68 per thousand per annum for blacks, as compared with 134.96 for whites.

DEPORTATIONS.

There were 20 deportations accomplished during the month, divided as follows: Employees, 13; nonemployees, 7; for disease, 15; and injury, 5.

CANAL ZONE.

A census of the Canal Zone taken by the police department between the 16th and 30th of June shows that there were 37,702 people living in the zone, of whom 18,548 were employees, 2,154 soldiers, 7,247 women, and 7,059 children. The estimated population for the preceding month was 54,655. The result of the census confirms the opinion expressed in former reports that the estimated population of the zone was much too high. The ratios in the present and future reports will be based on the new census.

The total number of deaths for the month was 54; of these, 46 deaths were from disease, giving a rate of 14.64 per thousand per annum, as compared with 9.22 for the preceding month, and 16.47 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 35, compared with 35 last month.

There were 63 births, giving a rate of 20.32 per thousand per annum. There were 15 deaths of children under 1 year of age, giving an infant mortality of 238 per thousand. For colored children under 1 year of age, the rate was 286.

PANAMA CITY.

The population of this city, which has been carried at 47,172 since July, 1912, has been increased this month by 15,000 people. This is an estimate based partly upon the number of employees and others who have emigrated from the Zone to the terminal cities, as shown by the recent census, and partly upon the estimates of

our health officers and sanitary inspectors, who have noted the great influx of people overcrowding all available houses in Panama. These figures will be checked by a census to be taken as soon as possible.

During the month there were a total of 176 deaths; of these, 172 deaths were from disease, giving a rate of 33.20 per thousand per annum, as compared with 38.16 for the preceding month, and 31.03 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 47, compared with 55 last month. The principal causes of death showing an increase were tuberculosis, pneumonia, heart disease, and malaria.

COLON.

In Colon, with an estimated population of 20,232, there were 68 deaths; of these, 66 deaths were from disease, giving a rate of 39.14 per thousand per annum, as compared with 26.10 for the preceding month, and 23.72 for the corresponding month of last year.

The increase death rate in Colon is, no doubt, largely due to an increased population, which has undergone no revision for the last two years.

The greater part of the increase was in children under 5 years of age, the percentage of whose deaths to the total deaths from disease increased from 36 in June to 47 in July.

The causes of death showing the largest increase are bronchitis and pneumonia, malaria, and malnutrition.

HOSPITAL DIVISION.

ANCON HOSPITAL.

There has been a decided decrease in the number of patients admitted to hospital since the new regulations governing treatment in hospitals has gone into effect. The number of admissions to Ancon Hospital in July were: Employees, 805; others, 509, as against 859 employees and 584 others in May, and this notwithstanding July usually shows the highest admission rate of any month in the year.

There has been a large increase in the revenues of the hospital, the total receipts being \$27,346.53 in July as compared with \$15,169.99 in April. This increased revenue has resulted in a decrease in the net per capita cost per patient from \$0.90 in April to \$0.396 in July, and this notwithstanding an increase in the cost of the ration from \$0.241 to \$0.277 in the same period.

During the month two of the old French wards (11 and 12) were found to be unsafe, and were evacuated with a view to their destruction and replacement.

Board of health laboratory.—The following special work was done: Bionomics of *Stegomyia scutellaris*. Breeding of citrus tree moths. Observations on the relation of *Anopheles albimanus* to *Anopheles tarsimaculata*.

Preparation of suitable mounting media for mounting pathological specimens for exhibit. Preparing and mounting specimens for exhibit.

Flea observations.

Susceptibility of sloth and deer to *Trypanosoma hippicum*.

Collection of data on syphilitic aortitis.

Examination of smears from placentas with relation to the diagnosis of malaria.

A study of the deteriorating effect of certain constituents in the atmosphere on larvacide.

Examination on the nonvolatile constituents of crude carbolic acid and the relation of these substances to the complete emulsification of the crude carbolic acid with resin soap.

An attempt to determine the slight amount of acid substances occurring in some hydrocarbon lubricating oils.

In addition, the bacteriologist is preparing the proceedings of the Canal Zone Medical Association for publication, and the chief of laboratory is collecting material and data for the San Francisco exhibit.

Farm for disabled.—During the month there were planted out 6,500 pineapple plants, 375 coconuts, 300 papayas, and 8 acres of Para grass; built 4,480 feet of wire fence and cleaned off site for cow barns. Cultivated corn, yams, bananas, yucca, Kaffir corn, sorghum, and vegetable garden.

Insane department.—During the month there were 22 admissions to the observation ward, and 2 patients were returned from the hospital proper where they had been transferred for surgical reasons.

Of the 18 discharges from the institution there were 11 recoveries, 1 was improved, and 6 were unimproved, the latter being deported to Barbados 2, England 1, Holland 2, and Spain 1.

Two deaths occurred within the month, 1 being an acute case and the other of a chronic nature.

The government of Jamaica has recently authorized the repatriation of 10 male and 10 female Jamaicans at present in the asylum, and it is expected that they will be deported in the next few weeks.

Negotiations have been initiated with the representatives in Panama of several foreign Governments with a view to the repatriation of their respective nationals also.

The health of the insane population was unusually good. No cases of malaria were admitted, nor did any develop either among the patients or employees.

The manual occupations of the patients, both at the Corozal farm and asylum, are making satisfactory progress, and the beneficial effects to them, as well as the economic value to the institution, are steadily becoming manifest.

Detailed statistics are shown in Table XIII.

COLON HOSPITAL.

The highest number of patients treated on any one day during the month was 57, the lowest number 41, the daily average being 48.16. The average number of employees constantly sick was 33.70. The average number of days' treatment per employee was 6.64.

Chronic ward.—There were 25.19 chronic and incurable patients constantly cared for during the month.

Detailed statistics are shown in Table XIV.

PALO SECO LEPER ASYLUM.

The number of patients under treatment at the end of the month was 51, an increase of 2 over the previous month.

Detailed statistics are shown in Table XV.

SANTO TOMAS HOSPITAL.

During the month a total of 1,307 cases were treated in the different wards, showing an increase over the preceding month. The daily average for the month was 362, a decrease of 6 from the preceding month. The total number of hospital days was 11,231; the per capita cost was \$0.8428 United States currency per day, and the subsistence cost \$0.235 per day.

The deaths for the month totaled 77, an increase of 14 over the preceding month. The births were 80, a decrease of 7 from the preceding month.

Malaria was the predominant disease treated, the rate being considerably higher than for the month preceding.

For the first time in many months the hospital was entirely free from typhoid fever, pneumonia, or dysentery on the first day of the month. Scarlet fever seems to be slightly on the increase, as does diphtheria and varicella.

During the month the new home for the pupil nurses was completed and at once occupied. Preparations for converting the former dormitory of the maternity pupils into an additional ward have been made, and this new ward should be ready for occupancy before the end of August.

Detailed statistics are shown in Table XVI.

DISTRICT DISPENSARIES.

The district having the largest admission rate for malaria was Toro Point, with an average weekly percentage of 1.24; that having the lowest admission rate for malaria was Culebra, with a percentage of .11.

Detailed statistics are shown in Table IX.

SANITATION DIVISION.

CANAL ZONE.

The malaria rate has been maintained at an exceptionally low level, considering the season and the fact that percentages are figured on a new, careful, and considerably lowered census.

As foreseen last month, very extensive *Anopheles* breeding areas developed back of San Miguel, but as work was undertaken early for the control of this, it is thought that serious harm will not result.

One case of typhoid fever developed in the zone in June.

Malaria carriers are now being brought under treatment to a greater extent than formerly, but not nearly all yet receive it. The negro towns are in even better condition than last month. The expenses of mosquito-prevention work are less in most towns than in any previous July, while the catches and the malaria rate indicate that the results are good.

Detailed statistics are shown in Table XVII.

PANAMA.

STREET CLEANING.

The new equipment for the street-cleaning service has arrived and will be set up and placed in operation as soon as practicable. With this new equipment we expect to be able to overcome the raising of dust clouds which are common where street brooms are used.

GARBAGE COLLECTION.

Garbage-collection service was satisfactorily maintained during the month, and all refuse matter received at the dump was cremated. A start was made on erecting an incinerator for cremating manure and will be placed in operation during the coming month. At this incinerator all manure collected in the city will be handled; this will allow a more rapid cremation of garbage at dump No. 2.

BUILDING INSPECTION.

It was found necessary to condemn 179 buildings during the month, and of this number 23 were demolished, 21 by the owners and 2 by the forces of this office. A total of 153 permits were issued for new buildings and repairs to old buildings. The status of building construction work since April 1 is shown below:

	Number of permits issued.	Number com- pleted.	Per cent.
April.....	131	86	66
May.....	175	75	42
June.....	207	70	31

Arrangements have been made so that property owners can secure high-grade gravel for their cement work. This will be of considerable benefit to all concerned, as it will allow of a better class of work than was possible under the old plan of using a low-grade sand which was the only kind obtainable in this city. Special attention is being given to the rat-proofing feature of all buildings in the city.

MOSQUITO, FLY, AND RAT WORK.

Fewer mosquito-breeding places were found during the month than has been reported for the two previous months, as shown by May, 1,400; June, 1,185; July, 752. There is also a slight reduction in the number of fly-breeding places found, there being 1,209 such areas located during July, as against 1,336 for the month of June. There was a total catch of 714 rats for the month; of this number 669 were sent to the laboratory for examination for plague. No plague-infected rats were found or reported during the month.

SCORE CARDS.

Hotels, restaurants, aerated water factories, breweries, ice cream parlors, dairies, and bakeries were regularly inspected during the month, and conditions found in these several places noted on the score card.

VACCINATIONS.

The work of vaccinating children was completed during the month, when 342 children were vaccinated, making a grand total of 5,186 children vaccinated. The work of vaccinating adults will be started during the coming month.

CONTAGIOUS DISEASES.

The following contagious diseases were reported during the month:

	Cases.
Diphtheria.....	4
Scarlet fever.....	3
Typhoid fever.....	2

All of the above cases were isolated as soon as found, and precautions taken to prevent the spread of the disease in each case. Of the two typhoid cases reported, one was contracted in Chorrea and is not chargeable to this district; the other case was presumably contracted in this city. Diagnosis of both cases was made on the Bass-Watkins agglutination test; Widal's in both cases was negative; no blood cultures were made. These cases were isolated and treated in the hospital.

Detailed statistics are shown in Table XVII.

COLON.

A special propaganda for cleanliness has been inaugurated through the press and posters, the slogan being "Clean up for opening day."

An arrangement has been made with the municipality for the collection and destruction of all unlicensed dogs in the city, and the work is already in progress.

A special effort is being made to keep the sidewalks clean and in good repair.

The antirrat campaign has been maintained. The Panama Railroad freight office has been made rat-proof, and the condition of the docks has been greatly improved.

The progress of vaccination has been temporarily suspended, until the arrival of additional vaccine.

Three cases of diphtheria have been the only communicable diseases reported during the month.

Detailed statistics are shown in Table XVII.

QUARANTINE SERVICE.

The plague situation in Havana, Cuba, appears to show an improvement, doubtless due to the active measures being taken. No report of any additional cases occurring at Santiago has been received.

Measures for plague eradication are being actively taken in New Orleans, and ships arriving from that port have complied with our regulations and are not being detained.

The situation regarding plague and yellow fever in South America remains about the same.

No quarantinable disease has arrived at any of the Isthmian ports during the past month.

Detailed statistics are shown in Table XVIII.

**SUMMARY OF ROUTINE WORK DONE BY THE HEALTH OFFICE,
PANAMA, DURING JULY, 1914.**

Mosquito work:	
Linear feet of ditches cleaned and maintained.....	43,230
Linear feet of new ditches dug.....	0
Number of cubic yards earth used in filling.....	0
Gallons larvacide used.....	653
Gallons crude oil used.....	140
Square yards pools oiled.....	60,940
Water containers treated.....	76,880
Mosquito breeding places found.....	752
Fly breeding places found.....	1,209
Gargage collections:	
Number of loads garbage removed to dump.....	4,142
Total number of cans garbage emptied.....	106,437
Buildings:	
Number of buildings inspected.....	6,605
Number of plans for new buildings approved.....	54
Number of permits granted for repairs to old buildings.....	99
Total number of permits granted.....	153
Number of buildings condemned.....	119
Number of buildings demolished.....	23
Street cleaning:	
Average number of square yards cleaned daily.....	600,000
Average number of square yards streets sprinkled daily.....	90,000
Number of private properties cleaned during month.....	13
Number of notices served and nuisances abated.....	191
Vaccinations:	
Number of vaccinations during month.....	342
Total vaccinations since Apr. 1, 1914.....	5,186

**GENERAL WORK REPORT FOR COLON, CRISTOBAL, MOUNT HOPE,
AND TORO POINT.**

HEALTH OFFICE,
Cristobal, July 31, 1914.

General sanitation, Colon:	
Square yards street cleaned.....	4,123,178
Square yards street sprinkled.....	0
Square yards alleys maintained.....	715,367
Loads, garbage, cubic yards.....	472
Private properties cleaned.....	94
Number of rats killed.....	152
Number of cans, garbage (2,152 cubic yards).....	67,587
Number of doses quinine issued.....	982
Square yards oiled.....	19,800
Number of receptacles treated.....	26,709
Number of mosquito breeding places destroyed.....	115
Number of fly breeding places destroyed.....	114
Number of buildings inspected.....	3,675
Gallons larvacide used.....	646
Gallons crude oil used.....	0
Number of nuisances abated.....	304
Colon dump maintained.....	
Buildings, Colon:	
Number of plans approved.....	2
Number of permits to occupy issued.....	2
Number of permits to repair issued.....	48
Number of temporary permits to occupy issued.....	1
Sewers, Colon (reported by division of municipal engineering):	
Number of new connections made during month.....	1
Total number of connections made to date.....	1,149
Number of houses in which extensions were made.....	6
Number of outstanding permits.....	36
Sanitation, Cristobal:	
Square yards pools oiled.....	4,400
Number of receptacles treated.....	3,709
Number of mosquito-breeding places destroyed.....	23
Number of fly-breeding places destroyed.....	11
Number of buildings inspected.....	360
Gallons larvacide used.....	44
Gallons of crude oil used.....	0

Sanitation, Toro Point (from 1st to 20th, inclusive):	
Square yards oiled.....	15, 150
Number receptacles treated.....	2, 660
Number of mosquito-breeding places destroyed.....	11
Number of fly-breeding places destroyed.....	1
Number of mosquitoes killed (Anoph. 1,240, Cul. 171).....	1, 411
Cubic yards ditching (old ditches redug).....	649
Linear yards ditches maintained.....	1, 193
Gallons larvacide used.....	27
Gallons crude oil used.....	284
Sanitation, Mount Hope:	
Square yards oiled.....	101, 800
Receptacles treated.....	23, 550
Number mosquito-breeding places destroyed.....	104
Number mosquitoes killed in bar (Anoph. 2401, Cul. 3,066).....	5, 467
Number mosquitoes killed in cars (Anoph. 10,098, Cul. 1,502).....	11, 600
Linear feet ditches maintained.....	19, 919
Gallons larvacide used.....	520
Gallons crude oil used.....	1, 830
General sanitation, Mindi Island (July 21 to 31, inclusive):	
Square yards filling in low places.....	3, 271
Square yards removing vegetation.....	582
Ditching (cubic yards 303½), linear yards.....	184
Vaccinations:	
From July 1 to 17.....	78
Number of patients examined and passed.....	512

TABLE XVIII.—QUARANTINE TRANSACTIONS AT THE PORTS OF BALBOA AND PANAMA FOR THE MONTHS OF JULY, 1914.

Number of vessels inspected and passed.....	15
Number of vessels inspected and held in quarantine.....	12
Total number of vessels inspected.....	27
Number of vessels fumigated on arrival.....	9
Number of vessels fumigated on departure.....	0
Total number of vessels fumigated.....	9
Number of crew examined.....	2, 171
Number of passengers from foreign ports examined and landed:	
Cabin.....	351
Steerage.....	124
	475
Total number of persons examined.....	2, 646
Number of persons vaccinated at ports of arrival because of compulsory vaccination law.....	4
Number of persons vaccinated at ports of departure or en route because of compulsory vaccination law.....	1, 231
Total number of persons vaccinated.....	1, 235
Number of persons held in quarantine at the detention house to complete period of incubation for fever or plague.....	85
Number of persons held in quarantine on board vessels to complete period of incubation of yellow fever or plague.....	1, 786
Total number of persons held under observation.....	1, 871
Number of persons embarked for foreign ports:	
Cabin.....	348
Steerage.....	195
	543
Number of persons arriving from coast towns in small launches and sailing craft.....	1, 642
Number of persons sailing for coast towns in small launches and sailing craft.....	1, 754
Number of bills of health issued.....	25
Number of certificates issued to outgoing passengers.....	61
Number of certificates refused on account of trachoma.....	2

Number of persons recommended for deportation.....	0
Total number of persons landed.....	2,117
Total number of persons sailing.....	2,297

Apparent decrease for the month..... 180

QUARANTINE TRANSACTIONS AT THE PORTS OF COLON AND CRISTOBAL FOR THE MONTH OF JULY, 1914.

Number of vessels inspected and passed.....	91
Number of vessels held in quarantine.....	9

Total number of vessels inspected.....	100
Number of vessels fumigated on arrival.....	7
Number of vessels fumigated on departure.....	7
Number of crew inspected.....	9,176
Number of passengers inspected, including 55 United States troops.....	5,297

Total number of persons inspected.....	14,473
Number of persons vaccinated in port on arrival.....	912
Number of persons vaccinated in ports of departure or en route.....	872

Total number of persons vaccinated.....	1,784
Number of persons detained in quarantine to complete period of incubation for yellow fever and plague.....	332
Number of persons detained on vessels.....	640

Total number of persons held under observation.....	972
Total number of persons landed from foreign ports:	
Cabin.....	1,920
Steerage.....	1,351
	3,271

Total number of persons embarked for foreign ports:	
Cabin.....	1,779
Steerage.....	1,829
	3,608

Number of persons in transit.....	1,482
-----------------------------------	-------

Number of persons from coast towns:	
Inspected.....	544
Not inspected.....	294

Number of persons leaving Colon for coast towns.....	259
--	-----

Number of persons landed during month:	
For immigration report.....	3,805
For Pacific ports.....	304
	4,109

Number of bills of health issued.....	10
---------------------------------------	----

Number of bills of health viséed.....	41
---------------------------------------	----

Number of persons recommended for deportation.....	2
